

COLOR ANALYSIS TESTER NOW INCLUDES PROFESSIONAL LEATHER STRAP AND PROFILE BOOKLET

\$52.95 These uniquely designed testers are printed with pure ink dyes on the finest paper for long lasting use. Previously, colorists paid substantially for the tester-tools and books but were trained at no charge. The internet and website response has changed everything — *The Science of Personal Dress* books are structured and illustrated so well that people can easily determine their own best colors. To order call Irene 925-462-6255

Here is the opportunity to compare and see the difference colors make on you and have the fun of analyzing family and friends. How-to instructions for fine-tuned

professional color analysis are included.

There 6 basic variations of all 10 color families (red, pink, green, blue, purple, yellow, rust-camel, plum, brown and white-black) which equal 60 ink-dyed color testers arranged in harmonic sequence to determine a person's basic Homebase colors. Also included are 20 half-page testers to illustrate needed contrast, and to brilliantly show how to combine warm, cool and balanced colors in clothing.

The tester is 8 1/2" x 11" with a cut out to secure the tester around the neck. The first thirty testers double for makeup, eye and accent colors; and the last thirty colors double for basic wardrobe neutrals and hair colors. The pages are thick enough to bend and display color combinations. The process is so scientific it will actually represent the exact percentages of warm, cool and balanced colors needed for the individual. Comes with adequate cord strap. There is also a professional leather strap for \$15.00.
